Education

PhD in Management (Organisational Behaviour), Erasmus University Rotterdam

Diplom (M.Sc.) in Psychology, Humboldt University Berlin

Research Areas

My research revolves around knowledge coordination processes in organizations, with the aim of creating a better understanding of how groups (e.g., teams) and organizations make use of their members' knowledge. I pursue several lines of research related to this main theme:

1. The role of individual and social cognition in group information processing, group decision making, and team performance
2. Communication and advice networks in organizations
3. Knowledge sharing and collaboration between groups: boundary spanning, multi-team systems
